

USB Data Transfer Cable - DATA TRANSFER CABLE PRO

DESCRIPTION

It is a USB host-to-host data bridge cable for two hosts connection. It is the easy solution that allows you to copy files from PC to PC without any driver installation when used with Windows OS. It is also best for the mobile and business user to share files without complicated network setup or time-consuming pen-drive copy.

FEATURES

1. Easy and quick file copy between two computers with High Speed USB 2.0
2. No driver installation needed - simply plug-in and follow the on-screen prompts
3. Simple drag and drop operation with similar UI as File Manager
4. File and mail synchronization function for using between home/office
5. PC-to-Mac file copy bridges two operation systems
6. Ideal for moving large amount photos, music, videos, files from one PC to another
7. USB port 5V bus powered and low power consumption
